

## FPA System - Preparedness Module – System Feature List

The System Feature List represents a preliminary set of features that are defined for the FPA System PM.

ITEM NO.	FEATURE	SUBJECT AREA	BUSINESS NEED	CURRENTLY IN THIS SYSTEM
1.	The ability to achieve fire management objectives in a cost-effective manner.	Costs	High	
2.	Standard way to determine if a fire cost is a fixed or variable cost.	Policy	High	IIAA
3.	The ability to relate suppression costs to a simulated event.	Costs	Medium	IIAA
4.	The ability to project the annual emergency suppression budget.	Budget	Medium	
5.	Standard method for determining fire behavior data across planning units.	Fire Behavior	High	
6.	Standard staffing by resource kind and type.	Policy	High	FirePro FireBase
7.	Automate the determination of what resources should be deployed.	Fire Resource	High	
8.	Business rules that are uniform systemwide.	Global (Policy)	High	None
9.	The ability to determine workload based on historical fire occurrence.	Global	High	
10.	The ability to use an optimization model to determine the optimum deployment organization.	Global	High	
11.	The ability to evaluate the effectiveness of alternative initial attack strategies.	Global	High	
12.	The ability to perform an integrated, holistic, fire management analysis.	Global	High	
13.	The ability to implement the delivered system in all five federal agencies.	Global	High	

FPA System - Preparedness Module – System Feature List

ITEM NO.	FEATURE	SUBJECT AREA	BUSINESS NEED	CURRENTLY IN THIS SYSTEM
14.	The ability to provide a process that links fire management goals and objectives and program performance with agency budgets and management activities.	Global	High	
15.	The ability to perform a federal interagency, objective driven, performance based fire program analysis for budgeting and organizational planning.	Global	High	
16.	The ability to use the delivered system at a landscape level across agency boundaries.	Global	High	
17.	The ability to support all business functions related to the planning and evaluation of effectiveness for each component included in the fire management program.	Global	High	
18.	Standard paygrade levels across all planning units for staffing specific resource kind and type.	Policy	High	FirePro, FireBase
19.	Single, common user-interface regardless of organizational or system-specific requirements.	User Interface	High	
20.	The ability to analyze the need for national resources, including staffing level, intended for initial attack.	Fire Resources	Medium	
21.	The ability to define scalable planning units.	Planning Unit	Medium	
22.	The ability to define potential dispatch locations for initial attack resources.	Fire Resources	Medium	IIAA
23.	The ability to track analysis data by fiscal year.	Global	High	IIAA, FirePro, FireBase
